

### Features

- 200W power handling capacity
- The high-frequency horn uses TM image control Technology and wave shaping vane technology to make the sound field control more precise .
- Unique mounting panel design provides a 15 degrees screen facing angle , significantly improving the sound field coverage .
- 1\*8" LF Driver with 2" voice coils, and 1\*1" HF driver
- Factory pre-installed and pointing adjusted
- A pair of inverted tubes are provided at the bottom of the box to improve the low-frequency response
- Asymmetric 110\*60 (H\*V) constant cover angle
- Combining bass gain technology with acoustic principle to significantly improve the bass effect of the system
- Frequency range : 80Hz-18kHz
- Sensitivity : 94dB
- Coverage angle : 110\*60
- Max SPL : 120dB
