

Features

- 350W power handling capacity
- The high-frequency horn uses TM image control Technology and wave shaping vane technology to make the sound field control more precise .
- Unique mounting panel design provides a 15 degrees screen facing angle , significantly improving the sound field coverage .
- 1*10" LF Driver with 3" voice coils, and 1*2" HF driver
- Factory pre-installed and pointing adjusted
- A pair of inverted tubes are provided at the bottom of the box to improve the low-frequency response
- Asymmetric 110*60 (H*V) constant cover angle
- Combining bass gain technology with acoustic principle to significantly improve the bass effect of the system
- Frequency range : 80Hz-18kHz
- Sensitivity : 98dB
- Coverage angle : 110*60
- Max SPL : 126dB
