

Features

- Two models of 500W (TM-2500) and 800W (TM-2800) per channel at 4-ohms
- TM Amplifiers are compatible for monitor, fault detection and crossover functions
- Power for 2-ohm, 4-ohm and 8-ohm outputs, supporting stereo and bridge outputs
- Support parallel connection of cinema surround speaker
- Indicators provide accurate diagnostics: Power, Signal, Clip and Fault
- Volume control on rear panel of amplifiers
- High performance, light weight
- DriveCore based amplifier – weighs less than 14lbs (6 kgs)

Some important features for install applications:

- Minimal front panel control; block connectors and controls on back of amplifiers
- High performance lightweight DriveCore based amplifier for audiophile quality and extremely high reliability
- Configurable input operation for stereo and parallel and bridge modes
- Configurable output operation for stereo and bridge modes
